

Bubble soccer risk assessment

Bubble ball Australia Pty Ltd is focused on safety so everybody can play Bubble soccer in a safe and enjoyable environment.

If there are any questions about the following risk assessment please contact Brent on 0405467766 or Bubbleballaustralia@gmail.com

Environmental Risk:

- We must ensure Bubble soccer is set up on a level flat piece of land
- All large sticks are removed from the Bubble soccer area to reduce the risk of injury and damage to the Bubble soccer suits
- The Area is no smaller than 15m x 15m and is away from any major roadways / fences or large trees
- Constant supervision is required on people's wellbeing inside the suits as it gets quite hot. Be extra vigilant on warmer days (30c+) and ensure longer drink breaks are taken.
- Bubble soccer is ok to be played in the rain though look out for lightning, If lightning has been detected within 5km's of the bubble soccer venue we must evacuate all players out of the suits and move to a safe area

Operational risk

- When setting up an area is in a close proximity to where the car is parked, If the area is further than 30 meters from the car use the designated trolley
- When starting the generator nobody should be within a 5m radius except for the Bubble soccer supervisor
- Hearing protection must be worn when inflating the balls at the DB reading is above 90.
- Bubble soccer suits must be fully checked each inflation for any small holes and be repaired accordingly
- Bubble soccer suits must be fully checked each inflation for strap condition and be adjusted to the age group of the players
- Each player's straps should be adjusted to approximately 10cm from the top of the ball.
- During the game players should be advised that absolutely no bumping into anybody that A) Does not have a bubble soccer suit on (B Is not standing up C) Are showing any signs of distress.
- Bubble soccer games should last approximately 10 minutes, Depending on weather and physical condition
- Players are to be reminded that the straps on the inside of the balls must be worn at all times to ensure safety.
- When commencing pack up as above, nobody except the bubble soccer supervisor should be within 5 meters of the generator.
